Subject: Highest paying engineering internships for Government College Of Engineering, Karad

Dear Prof. Ashok Pise,

Hope you are doing well.

I am excited to inform you that we have launched a dedicated campaign for students pursuing engineering - Highest Paying Engineering Internships.

We believe that many students who have the right skills and look forward to gaining practical experience are not able to find good internships near their area. Through this campaign, we bring you 30+ engineering-based work from home internships which will enable your students to do internships throughout the year from their college/hostel/home etc, few highlights of the campaign -

- Stipends varying from INR 5000 to INR 40,000 (per month) and a certificate of completion
- Open for students from all the technical degrees like B.Tech, M.Tech, BCA & MCA
- Profiles like Web Development, Mechanical Design, Information Technology, Industrial And Production Engineering, and many others

Students can register themselves for the campaign here - internshala.com/i/1840988. **The last date to register and apply is 14th October.**

I kindly request you to share this email with all your students (all years and streams). You may also [download](#) this notice and have it circulated among your students for maximum participation.

For any questions or doubts please feel free to contact my colleague Mr. Abhinav on +91 89292 94027

Many thanks,
Aayushi Sharma
