

IT'S CREATURE 2K22-23 IT DEPARTMENT

ITSA INAUGURATION

The inauguration ceremony of the Information Technology Students' Association (ITSA) was held with great enthusiasm and pride. ITSA aims to foster a sense of community among IT students while promoting academic and professional growth. The ceremony marked the official launch of ITSA and its commitment to enhancing the IT education experience. Distinguished dignitaries, faculty members, and students graced the event. It commenced with a warm welcome address by the President of ITSA, who outlined the organization's goals and vision. This was followed by valuable speeches from the honorable HOD, Dr. Wagh, and Faculty Advisor, Dr. Yelure. The ceremony concluded with heartfelt closing remarks by the Vice President of ITSA, who expressed gratitude to all attendees and supporters.

LET'S BUZZ IT

The Technical Buzzer Round is a fast-paced quiz format. Participants are presented with a series of technical questions covering a wide range of subjects, including maths, science, engineering, computer programming languages, and general technology. Using handheld buzzers, participants signal their readiness to answer. The first person to buzz gets the opportunity to respond. This format adds an element of excitement and competition, as contestants must think quickly and accurately to earn points for correct answers. The questions are designed to thoroughly test the participants' knowledge.

TECHNOVATION

The IT Students' Association organized a technical event, Technovation, for all college students under Avishkar - Envision to Reality. Open to 1st to 4th-year students, the event was held on February 20th and attracted around 90 participants from various colleges. The event consisted of three rounds: Techmesh, the Bug Busting Challenge, and a surprise round. In Techmesh, questions related to technologies and various coding languages were posed. In the Bug Busting Challenge, each team received a problem statement with bugs they had to identify and fix. The selected teams then proceeded to the surprise round. The event was conducted in the IT Department of Govt. College of Engineering, Karad. The technical event coordinator was Saurabh Nanekar, and the faculty advisors were Prof. Kunjali Pawar and Prof. Priyanka Patil.

IDEATHON

An Ideathon is an event focused on generating innovative and creative ideas to address specific challenges or problems. It brings together individuals or teams to brainstorm, collaborate, and come up with potential solutions within a set time frame. Participants work together to explore novel approaches and propose inventive solutions to complex issues. During the Ideathon, participants were encouraged to challenge conventional wisdom and explore unconventional ideas. Mentors were available throughout the event to guide and support participants in refining their ideas. This Ideathon offered participants the opportunity to showcase their problem-solving skills.

ALUMNI TALK SERIES

The Alumina Talk series, a recurring event in our department, features accomplished graduates who return to share their experiences and insights with current students. The latest series included talks by Prashant Garud, President of JP Morgan Singapore, and Abhishek Dhawan, who discussed Artificial Intelligence for neuroscience. The series aims to inspire, motivate, and provide valuable guidance to the student community. During the talks, alumni shared their post-college journeys, including their career paths, challenges faced, lessons learned, and key milestones achieved. They also offered advice on navigating the transition from college to the professional world and provided tips for personal and career growth. The sessions were interactive, allowing students to ask questions, seek advice, and engage in meaningful discussions.
